## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-17, 48, 50-59, and 61-66 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

3. Claims 1, 48, and 55 recite a sonophoresis system with combination lead/can delivery. The specification supports a lead embodiment and a can embodiment, but the Examiner was unable to find support for a combination lead/can embodiment. Further, the Examiner was unable to find support for a *single* driving arrangement that provides sonophoresis delivery from both the lead and the can, as recited in claims 1, 48, and 55. Lastly, in regards to claim 55, the Examiner was unable to find support for an embodiment with a driver apparatus configured to facilitate sonophoresis *of at least one* of the pharmacological agents because there is no disclosure of a single driver to facilitate delivery from both the can and the lead.

4. Claims 1-23, 25-32, 48, 50-59, and 61-66 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Elements critical or essential to the practice of the invention, but not included in the claim(s) is not enabled

Art Unit: 3762

by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Claims 1, 18, 48, and 55 recite driving arrangements that are lacking critical elements.

The driving arrangement, as disclosed, is incapable of operation without a ground layer and power source to cause movement of the PVDF layer.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-23, 25-32, 48, 50-59, and 61-66 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: a ground layer and power source in the driving arrangement.

7. Claims 1-17, 48, 50-59, and 61-66 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. Claim 1 is vague because the pharmacological agent is an element of the implantable cardiac system, and the pharmacological agent is provided along an exterior surface of the implantable cardiac system, amounting to a recitation of a pharmacological agent provided along an exterior surface of a pharmacological agent.

9. Claims 1, 48, and 55, the driving arrangement/means for impelling/driver apparatus is vague because it is unclear whether the same driver is being used for both the lead and the can, or whether two separate drivers are being used.
